AN AWARENESS ON USAGE OF AROGYA SETU APP DURING COVID 19

The Arogya Setu App, essentially a contact-tracing app developed and promoted by the Government of India to minimize the spread of COVID-19 is being used in India to identify if someone has symptoms of COVID-19, their location, and contact tracing. The app has been promoted by the Prime Minister, Mr Narendra Modi, and was a prerequisite for all passengers travelling in special trains, or domestic flights that were resumed recently to ferry migrants back to their hometowns. The use of Arogya Setu app by all citizens of the country has been recommended, in order to ensure better contact tracing, which can significantly reduce the spread of the corona virus. Contact tracing is important for any contagious viral spread, especially COVID-19. Given the large scale of the corona virus infection and its spread, contact tracing becomes extremely important in order to identify who requires testing, quarantine, and immediate medical help. As Government requests social media platforms to promote Aarogya Setu app NSS Unit of PSCMRCET has taken an initiation to create awareness among the citizens of country to install this app in their mobiles through a questionnaire and 10372 people were participated in to this event.
