The three-week certification course Main focus to do hands on practical with IOT technology of 21st century. IOT technology learning explores the area of connect and exchange data with other devices and systems over the internet or other communication networks. An IoT ecosystem consists of web-enabled smart devices that use embedded systems, such as processors, controllers, sensors and communication hardware, to collect, send and act on data they acquire from their environments. IoT can also make use of artificial intelligence (AI) and machine learning to aid in making data collecting processes easier and more dynamic. Now a day IoT is one of the most important technologies of everyday life, and it will continue to pick up steam as more businesses realize the potential of connected devices to keep them competitive.

REPORT

Name of the course: Certificate course on **3Ds Max** software

Duration: 09-09-2019 to 25-09-2019

Resource Person: Prof K.V. Lakshmi Narayana

Head of the department

Mail Id: kvlnarayana@gmail.com

The Department of Civil Engineering, PSCMRCET has conducted a certificate course on 3ds Max software from 09 SEPTEMBER 2019 to 25 SEPTEMBER 2019 for the second, third and fourth year Students. "3ds Max- 3D Studio Max", is a 3D computer graphics program for making 3d animations and models. Using this software, one can create any kind of Complex model easily. 3D model that provides comprehensive 3D modelling, animation, rendering and architectural visualization. 3D modeling, visualization, and automatic code-based learning are some of the unique features of this software.

This software is loaded with an integrated system consisting of modeling tools and templates used to automate repetitive tasks, combine existing functionality in new ways. The software can handle the largest and most complex model and associated Configurations. 3ds Max software is embedded with CAD- like drawing tools with an object- based interface. 3ds Max also supports several rendering models like scanline rendering, Render Man, Indigo Renderer, Maxwell render and Octane render etc, . Around 172 students from II , III & IV year attended the certificate course which will be very useful once they enter into the civil industry.

PSCMR College of Engineering & Technology is SKPVV Hindu High School Committee's latest contribution to the cause of education. This time in a new discipline Engineering & Technology. This shows the Committee's response to promote education in so many different areas as possible. The Committee, a non-profit academic organization that had been managing very successfully only school and arts & science colleges till 2006, then extended its educational service activities to technology education area, and that led to the starting of year of Potti Sriramulu Chalavadi Mallikarjuna Rao College of Engineering & Technology, almost the first such institute within the Vijayawada city limits. The college is affiliated to JNTU (K) made a modest beginning with an intake of 240 students, 60 each in the branches of EEE, CSE, EEE and IT. MBA course was added the next year, that is, in 2008. Making steady progress, it has now on its rolls 1200 students in two sections of EEE and CSE each, and also section each in EEE and IT. In only its fourth year of functioning, the college has shown its potential for excellence in academics, as shown in the success rate of the students, and in making all out efforts to secure placement for its students. For a sound engineering education and assured post-qualification career, PSCMRCT is among the best destination.

The institute is accredited by NAAC and its programmes (ECE, EEE, EEE) are accredited by National Board of Accreditation (NBA). The institute is affiliated to Jawahar Education Technology University, Kakinada (JNTUK).

EEE Department was founded with a threefold mission in teaching, research and public service. Based on that foundation, the mission of the Department in all major fields of electrical engineering, is to instill in students the attitudes, values, vision and training that will prepare them for careers of continued learning and leadership, to develop the ability and passion for work variety, creativity and effectively for the benefit of our society.

The students, who participated, felt strong and confident in communicating at the workplace and the outcome from the program reaches more than the expected satisfaction levels.

Main focus of the workshop was to do hands on practical with Data Science (Google CoLab) tool. The field of Data Science is maturing rapidly and demands professionals skilled not only in Statistics, but also in advanced concepts such as Natural Language Processing and Neural Networks. Artificial intelligence and Machine learning (AI & ML) methods leverage the superior computational capabilities of machines that can process large amounts of data, and find patterns and associations through sophisticated algorithms. Many business functions are forced to make decisions, without access to the necessary facts and intelligence, from their own data set to achieve alignment with business objectives. Further, in this digital age, massive amounts of data are being produced by information systems, user devices and IoT devices.

DEPARTMENT OF MECHANICAL ENGINEERING

Report on A Three week certificate course on "JAVA"

(20-01-2020 to 08-02-2020)

The Department of Mechanical Engineering, PSCMRCET has conducted A Three week certificate course on "JAVA" for which the resource person is Dr.D.Durga Prasad, Professor, Department of CSE, PSCMRCET for IV year MECH students from 20-01-2020 to 08-02-2020

Java is a programming language and computing platform first released by Sun Microsystems in 1995. It has evolved from humble beginnings to power a large share of today's digital world, by providing the reliable platform upon which many services and applications are built. New, innovative products and digital services designed for the future continue to rely on Java, as well.

While most modern Java applications combine the Java runtime and application together, there are still many applications and even some websites that will not function unless you have a desktop Java installed. Java.com, this website, is intended for consumers who may still require Java for their desktop applications – specifically applications targeting Java 8. Developers as well as users that would like to learn Java programming should visit the dev.java website instead and business users should visit oracle.com/java for more information.

Around 109 students from IV year attended the training program which will be very useful once they enter into any industry. A few faculty members from Mechanical Engineering department also attended this training program along with the students.

Outcomes:

1. Write programs for solving real world problems using java collection frame work
2. Write programs using abstract classes
3. Write multithreaded programs.

DEPARTMENT OF MECHANICAL ENGINEERING

Report on A Three week certificate course on "HTML"

(20-01-2020 to 08-02-2020)

The Department of Mechanical Engineering, PSCMRCET has conducted A Three week certificate course on "HTML" for which the resource person is Ch.B.V.Durga, Assistant Professor, Department of CSE, PSCMRCET for I year MECH students from 20-01-2020 to 08-02-2020.

HTML stands for HyperText Markup Language. It is used to design web pages using a markup language. HTML is the combination of Hypertext and Markup language. Hypertext defines the link between web pages. A markup language is used to define the text document within the tag which defines the structure of web pages. This language is used to annotate (make notes for the computer) text so that a machine can understand it and manipulate text accordingly. Most markup languages (e.g. HTML) are human-readable. The language uses tags to define what manipulation has to be done on the text. HTML is a markup language used by the browser to manipulate text, images, and other content, in order to display it in the required format.

Around 29 students from I year attended the training program which will be very useful once they enter into any industry. A few faculty members from Mechanical Engineering department also attended this training program along with the students.

Outcomes:

1. Insert a graphic within a web page.
2. Create a link within a web page.
3. Create a table within a web page.
4. Insert heading levels within a web page.
5. Insert ordered and unordered lists within a web page.
6. Use cascading style sheets.
7. Create a web page.

DEPARTMENT OF MECHANICAL ENGINEERING

Report on A Three week certificate course on "Corporate Builders"

(10-2-2020 to 29-2-2020)

The Department of Mechanical Engineering, PSCMRCET has conducted A Three week certificate course on "Corporate Builders" for which the resource person is Dr. A. Rama Devi, Professor of English, PSCMRCET for III year MECH students from 10-2-2020 to 29-2-2020.

English is one of the widely spoken languages around the world. For an engineer and an engineering student, English language fluency is important both in studies and career. Engineering is one of the largest fields of study and many of the works of research and academics are recorded in English. Without fluency in English, engineering students may find it difficult to understand the concept being conveyed by the authors. Also, many modules in engineering require writing academic reports. Hence, a good fluency and grasp of English language is necessary.

Basic reasons why an Engineer should be fluent in English are as follows:

In a student's social life, English language is most important. It helps to build strong relationship and better understanding among fellow students and peers. For success in any field, one has to know, understand and communicate effectively. In the era of liberalisation, privatisation and globalisation, communication skills are the key to success. The English language is now a bridge language of international business, technology, research and aviation. About 1.8 billion speak English and the number is still rising.

Around 94 students from III year attended the training program which will be very useful once they enter into any industry. A few faculty members from Mechanical Engineering department also attended this training program along with the students.

Outcomes:

1. Will get fundamental knowledge of about behavioral skills.
2. Will be write emails, presentations, communication skills.

DEPARTMENT OF MECHANICAL ENGINEERING

Report on A Two week certificate course on "Designing of solar energy pv systems"

(03-03-2020 to 17-03-2020)

The Department of Mechanical Engineering, PSCMRCET has conducted a A Two week certificate course on " Designing of solar energy pv systems " for which the resource person is V.Brahmeswara Rao, Assistant Professor, Department of EEE, PSCMRCET from 03-03-2020 to 17-03-2020 for the third year Students.

Solar photovoltaic modules are where the electricity gets generated, but are only one of the many parts in a complete photovoltaic (PV) system. In order for the generated electricity to be useful in a home or business, a number of other technologies must be in place

Around 126 students from II year attended the training program which will be very useful once they enter into the software industry. A few faculty members from Mechanical Engineering department also attended this training program along with the students.

Outcomes:

1. Will get fundamental knowledge of PV System.
2. Understand the energy conversion from sunlight to electricity ,and working with solar conversion equipment .
3. Will get the book knowledge and hands on experience needed to become entrepreneur.

Designing solar energy PV Systems

Week	Day	Content
1	1	Basics Of Solar Energy System.
	2	Batteries In PV System
	3	Components And Design Of Off Grid Solar Energy System
	4	Designing Of On Grid Solar Energy System.

Because of Covid-19, Workshop was conducted virtually. Participants are allowed to register through the google form "<https://forms.gle/i6ZJQfgX56XxaGUX7>"

Mr.G.V. Ramanaiah delivered the lecture on Examples of SCILAB and conducted hands on section with different examples.

Dr. A. Ravi delivered the lecture on the importance of SCILAB. He also explained about the introduction, operators used and various functions used in SCILAB. He discussed about various real time scenarios.

SCILAB Built-in functions explained by Resource Person

Built-in functions

Below is a list of common math functions in Scilab. A full list of built-in functions can be found under Help/Elementary Functions, which also explains nomenclature on functions (there are both mandatory and optional arguments)

<code>cos()</code> , <code>cosd()</code> , <code>acos()</code> , <code>acosh()</code>	Trigonometric functions, e.g. <code>cos()</code> , <code>cosd()</code>
<code>asin()</code> , <code>asind()</code> , <code>atan()</code>	Arc functions
<code>sinh()</code> , <code>cosh()</code> , <code>tanh()</code> , <code>coth()</code>	Hyperbolic functions
<code>asinh()</code> , <code>acosh()</code> , <code>atanh()</code>	Inverse hyperbolic functions
<code>sqrt()</code> , <code>exp()</code>	Square root, e.g. <code>sqrt(2)</code> , exponent
<code>sum()</code>	Sum
<code>min()</code> , <code>max()</code>	Minimum - maximum value
<code>abs()</code> , <code>sign()</code>	Absolute value, e.g. <code>abs(sin(x))</code> , sign
<code>real()</code> , <code>imag()</code>	Real & imaginary parts of a complex f

hyperbolic functions. Cos H gives the COS hyperbolic function tan his like that, but there has caught also here. There is a difference here here covid G can be directly written but in the hyperbolic cotangent function, there is no Z hyperbolic cotangent function. There is no Z music instead of Z. We use H to get the hyperbolic trigonometric function.

He gave brief idea about how to identify the problems from engineering applications. He motivated the students to do projects and improve their carrier opportunities.

As per the feedback received from the participants it was a very good learning experience, the lecture helped them in understanding the basics of SCILAB and how to apply the concepts learned in their curriculum to do projects.
